

GPU Compositing

About GPU Compositing

GPU compositing is an OpenGL ES2.0 based composition solution that provides the logic to display video and graphics frames from the memory on a display supported by the device. It uses texture streaming extension, which is a proprietary OpenGL ES extension from Imagination Technologies for rapidly changing textures.

The GPU compositing includes the following main features:

- **Build time user configurable number of planes (Graphics & Video separately)**
- **Graphics Pipeline**
 - supported pixel formats: RGB565, ARGB8888
 - Blending - global or pixel level alpha
 - Blending order - Graphics plane 0 being the first.
- **Video Pipelines**
 - supported pixel formats: YUV422, NV12, I420 & YUV420
 - Overlay Order: Video plane 0 at the bottom.
- **Maximum plane resolution of 2048x2048**
- **Plane Resizing - configurable output window position and resolution in terms of normalized device co-ordinates**
- **Plane Rotation (Z-axis only) - in units of decimal degrees**
- **Automatic color conversion to the output frame buffer format (ARGB8888 & RGB565)**
- **Flicker Free Composition - Synchronized with Display Rate**

The solution comprises of the following components

- composition - OpenGL ES2.0 based composition
- gpuvsink - GStreamer GPU based video sink works in conjunction with the composition application
- linuxfbofs - Qt display driver for rendering to an offscreen surface
- transBgSmpQtUI - Sample Qt Application demonstrating simple UI with transparent background

GPU Compositing Source Download [1]

The following representation is used to differentiate between the host and target commands throughout this document

- \$ - command to be executed on host
- # - command to be executed on target

Dependencies

- AM SDK [2] - Graphics SDK needs to be upgraded to 04_06_00_03 along with one change [3]

Steps to upgrade the filesystem with Graphics SDK 04_06_00_03 - for AM335x only

- change - Modify the texture streaming device count to 10 in the file
"GFX_Linux_KM/services4/3rdparty/bufferclass_ti/bc_cat.c"

```
#define DEVICE_COUNT 10
```
- Build the Graphics SDK as per the instructions in the Graphics SDK User Guide for the release build except the last "make install" step

- Instead of the "make install", copy the directory gfx_rel_es8.x (for AM335x) manually on to the target file system from host as below

```
Graphics_SDK_4_06_00_03$ cp -r gfx_rel_es8.x /home/a0756700/nfs/am335x_0505_fs/opt/
```

- Run the update script on target

```
#!/upgradeGfxSdk.sh
```
- Reboot EVM
- CMEM - Linux Utility for allocating contiguous memory [4]

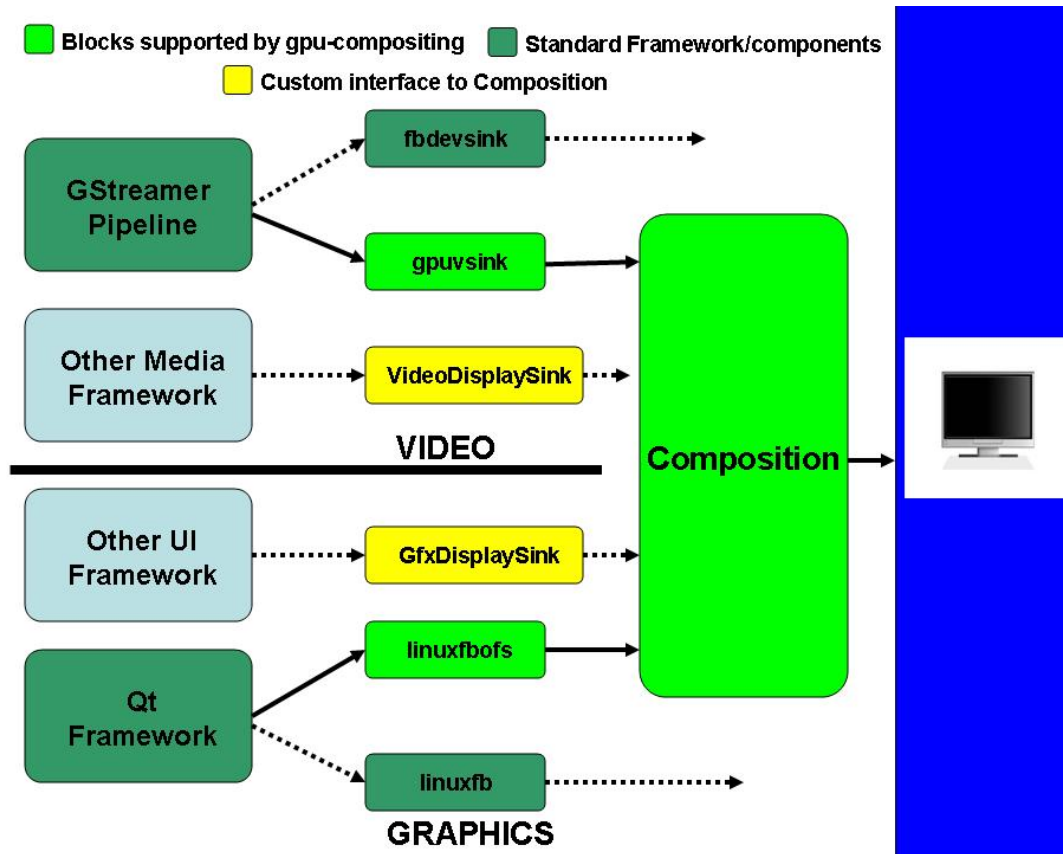

Directory structure

Folders		Name	Size	Type
<ul style="list-style-type: none"> gpu-compositing <ul style="list-style-type: none"> composition gpuvsink linuxfbffscreen targetfs transBgSmpQtUI 		common.c	9 KB	C Source
		common.h	3 KB	C/C++ Header
		gpu_composition	73 KB	File
		main.c	30 KB	C Source
		Makefile	1 KB	File
		rules.make	1 KB	MAKE File

gpu-compositing - Top level folder containing the following sub-directories

- composition - GPU based composition - OpenGL ES2.0 based application
- gpuvsink - GStreamer plugin - GPU based video sink, which works in conjunction with the composition application using named pipe.
- linuxfbffscreen - Qt Display driver for rendering to offscreen surface (depends on CMEM module for allocating contiguous memory for the offscreen surface)
- targetfs - contains target init script, creates required named pipes
- transBgSmpQtUI - Sample Qt Application with transparent background
- gpucomp.h - Public header file for the gpu composition - defines the external interface and config structures
- userguide.pdf - This document

Functional Flow Diagram

composition - OpenGL ES2.0 based compositing

Composition is an OpenGL ES 2.0 based application, responsible for compositing video and graphics planes. The graphics planes are alpha blended over the video planes with higher numbered plane being blended on top of the lower numbered planes.

It receives commands for graphics and video configuration and video data buffer pointers via named pipes.

Named Pipe for video config and data - "/opt/gpu-compositing/named_pipes/video_cfg_and_data_plane_X"

Named pipe for graphics config - "/opt/gpu-compositing/named_pipes/video_data_plane_X"

where X denotes the plane number.

Graphics Configuration

The structure below is used for configuring a graphics plane via named pipe.

```
typedef struct
{
    int enable; /* 1 - enable the gfx plane; 0 - disable */
    int input_params_valid; /* 1 - valid i/p parameters; 0 - invalid */
    struct in_g {
        unsigned long data_ph_addr; /* physical address of the gfx buffer */
        int width; /* gfx plane width in pixels */
        int height; /* gfx plane height in pixels */
        unsigned int pixel_format; /* fourcc pixel format */
        int enable_blending; /* 1 - blending enabled; 0 - disabled */
        int enable_global_alpha; /* 1 - global alpha; 0 - pixel alpha */
    };
};
```

```

    float global_alpha;          /* global alpha value  [0.0 to 1.0]      */
    float rotate;                /* rotate angle in decimal degrees [-180.0 to 180.0]*/
} in_g;
/* output window position and resolution in normalized device co-ordinates */
int output_params_valid;        /* 1 - valid o/p parameters; 0 - invalid */
struct out_g {
    float xpos;    /* x position [-1.0 to 1.0] */
    float ypos;    /* y position [-1.0 to 1.0] */
    float width;   /* width - [0.0 to 2.0], 2.0 correspond to fullscreen width */
    float height;  /* height - [0.0 to 2.0], 2.0 correspond to fullscreen height */
} out_g;
} gfxCfg_s;

```

Video Configuration

The structure below is used for video plane configuration and passing the video data pointers.

```

#define MAX_VIDEO_BUFFERS_PER_CHANNEL 16
typedef struct
{
    int config_data; /* 1 - config  0 - data */
    int buf_index;   /* if data, buffer index */
    int enable;      /* 1 - enable the video plane; 0 - disable */
    /* Video plane config structure */
    struct in {
        float rotate; /* rotate angle in decimal degrees [-180.0 to 180.0]*/
        int count;    /* Number of video buffers */
        int width;     /* video frame width in pixels */
        int height;    /* video frame height in pixels */
        unsigned int fourcc; /* pixel format */
        unsigned long phyaddr[MAX_VIDEO_BUFFERS_PER_CHANNEL]; /* Physical addresses of video buffers */
    } in;
    /* output video window position and resolution in normalized device co-ordinates */
    struct out {
        float xpos; /* x position [-1.0 to 1.0] */
        float ypos; /* y position [-1.0 to 1.0] */
        float width; /* width - [0.0 to 2.0], 2.0 correspond to fullscreen width */
        float height; /* height - [0.0 to 2.0], 2.0 correspond to fullscreen height */
    } out;
} videoConfig_s;

```

Build/Install Steps

- \$ cd composition/
- edit rules.make for the toolchain, cmem, Graphics SDK and target filesystem paths
- \$ make clean
- \$ make
- \$ make install

Execution steps

- Boot up EVM with the required memory reserved for cmem module.

e.g.

```
setenv bootargs 'console=ttyO0,115200n8 root=/dev/nfs nfsroot=172.24.132.46:/home/user/targetfs,nolock rw
mem=128M ip=dhcp'
```

Initial 128M is allocated for the kernel, cmem memory can be beyond this.

- Run init script and insert the cmem module (dependent module, to be built from the source available at the link under the dependencies section)

```
# cd /opt/gpu-compositing/
# ./init.sh /* Needs to be run only once on the target */
#insmod          cmemk.ko          "phys_start=0x88000000          phys_end=0x8F800000
pools=1x10000000,1x10000000,1x10000000,1x10000000,1x5000000,1x5000000,1x5000000,1x5000000
allowOverlap=1"
```

Refer to the section "Overall Execution steps on Target" to know calculating the pool sizes.

```
# ./composition &
```

The screen should look black after executing the above commands. The composition module is now ready to accept the video and graphics configurations from other applications via named pipes.

composition performance

720x480 video (covering full output screen of 800x480) - 88 fps

720x480 video + 800x480 Graphics (Both covering full output screen 800x480) - 63 fps

gpuvsink – GStreamer GPU based video sink

gpuvsink is gstreamer video sink module, responsible for synchronized displaying of the received video frames using gpu (sgx). This works in conjunction with composition application for actual displaying of frames. It uses named pipe as the method for communicating video plane configurable parameters and data to the composition application.

The named pipes are /opt/gpu-compositing/named_pipes/video_cfg_and_data_plane_X, where X denotes the plane number.

Build Steps

- \$ cd gpuvsink/
- edit src/rules.make for CMEM PATH variable
- edit doconfigure.sh for prefix path (target installation path)
- \$./autogen.sh
- Set up the AM SDK build environment
 - \$ source /home/user/ti-sdk-am335x-evm-05.05.00.00/linux-devkit/environment-setup
- \$./doconfigure.sh
- \$ make
- \$ make install /* e.g. install to "/home/user/targetfs/usr/lib/gstreamer-0.10/" directory */

Command Line Option

Multiple options are specified separated with space.

- x-pos <float - x position of the output video window in normalized device co-ordinates (-1.0 to +1.0) default=-.5>
- y-pos <float - y position of the output video window in normalized device co-ordinates (-1.0 to +1.0) default=0.5>
- width <float - width of the output video window in normalized device co-ordinates (0.0 to 2.0) default=1.0>
- height <float - height of the output video window in normalized device co-ordinates (0.0 to 2.0) default=1.0>
- channel-no=<int - video plane number(0 to MAX_VID_PLANES) default=0 >
- rotate=<float - rotate angle in degrees (-180.00 to 180.00) default=0.0>

Usage Examples

```
#gst-launch filesrc
location=/opt/gpu-compositing/streams/AAC_HEv1/2012_AAC_HE_720x480_24fps.mp4 ! decodebin2
name=dec ! gpuvsink x-pos=-1.0 y-pos=1.0 width=2.0 height=2.0 channel-no=0 rotate=0.0 &

#gst-launch filesrc location=streams/test2.mp4 ! decodebin2 name=dec ! gpuvsink x-pos=-0.4 y-pos=0.0
width=1.0 height=1.0 channel-no=1 rotate=25.0 &
```

Display Snapshot:

linuxfbofs - qt display driver for rendering to offscreen surface

linuxfbofs is a Qt display driver, which supports rendering to an offscreen surface. It allocates physically contiguous memory using CMEM module for the offscreen surface with the same properties as linuxfb. It works in conjunction with the composition, which is basically an OpenGL ES 2.0 based compositing application. The physically contiguous memory for the offscreen surface is required as it's shared across processes. It uses named pipe as the method for communicating the offscreen buffer and it's properties to the composition application. The named pipe used for this purpose are `/opt/gpu-compositing/named_pipes/gfx_cfg_plane_X`, where X indicates the plane number. It uses `gfxCfg_s` (`gpucomp.h`) structure for communicating the surface properties.

Build Steps

- Set up the Qt build environment
e.g. run `$source /home/user/ti-sdk-am335x-evm-05.05.00.00/linux-devkit/environment-setup`
- Edit the Qt project file (`linuxfbofs.pro`) for the CMEM include and library paths
e.g. `INCLUDEPATH += /home/user/cmem/include`
`LIBS += /home/user/cmem/lib/cmem.a470MV`
- Generate Makefile from the Qt project file
e.g. `$/home/user/ti-sdk-am335x-evm-05.05.00.00/linux-devkit/bin/qmake -o Makefile linuxfbofs.pro`
- `$make`
- `$make install` /* set up the installation path to copy `libqscreenlinuxfbofs.so` file on to the target - `/usr/lib/*qt plugins directory*` (e.g. `/usr/lib/qtopia/plugins/gfxdrivers/`)

Specifying the Driver

To specify the driver set the display environment variable as below

```
export QWS_DISPLAY=linuxfbofs[:<driver specific options>]
```

Alternatively, The QWS_DISPLAY environment variable can be set using the -display option when running an application. e.g.

```
#!/app -qws -display linuxfbofs[:<driver specific options>]
```

Driver Specific Options

The multiple driver options are specified with each separated with a colon

- gfx_no=<int - graphics plane number(0 to MAX_GFX_PLANES) default=0 >
- xpos=<float - x position of the output graphics window in normalized device co-ordinates (-1.0 to +1.0) default=-1.0>
- ypos=<float - y position of the output graphics window in normalized device co-ordinates (-1.0 to +1.0) default=1.0>
- width=<float- width of the output graphics window in normalized device co-ordinates (0.0 to 2.0) default=2.0>
- height=<float- height of the output graphics window in normalized device co-ordinates (0.0 to 2.0) default=2.0>
- blend_en=<int- 1-enable 0-disable blending default=1>
- glob_alpha_en=<int- 1 - global alpha 0 - pixel level alpha default=1>
- global_alpha=<float- value of the global alpha (0.0 to 1.0), valid if glob_alpha_en=1 default=0.5 >
- rotate=<float- rotate angle in degrees (-180.00 to 180.00) default=0.0>

All the float parameters must be specified in x.x format only even if the value is '0' after the decimal point.

Blend Equation

Cf = Cg * alpha + (1-alpha) Cb

Cf - Final color

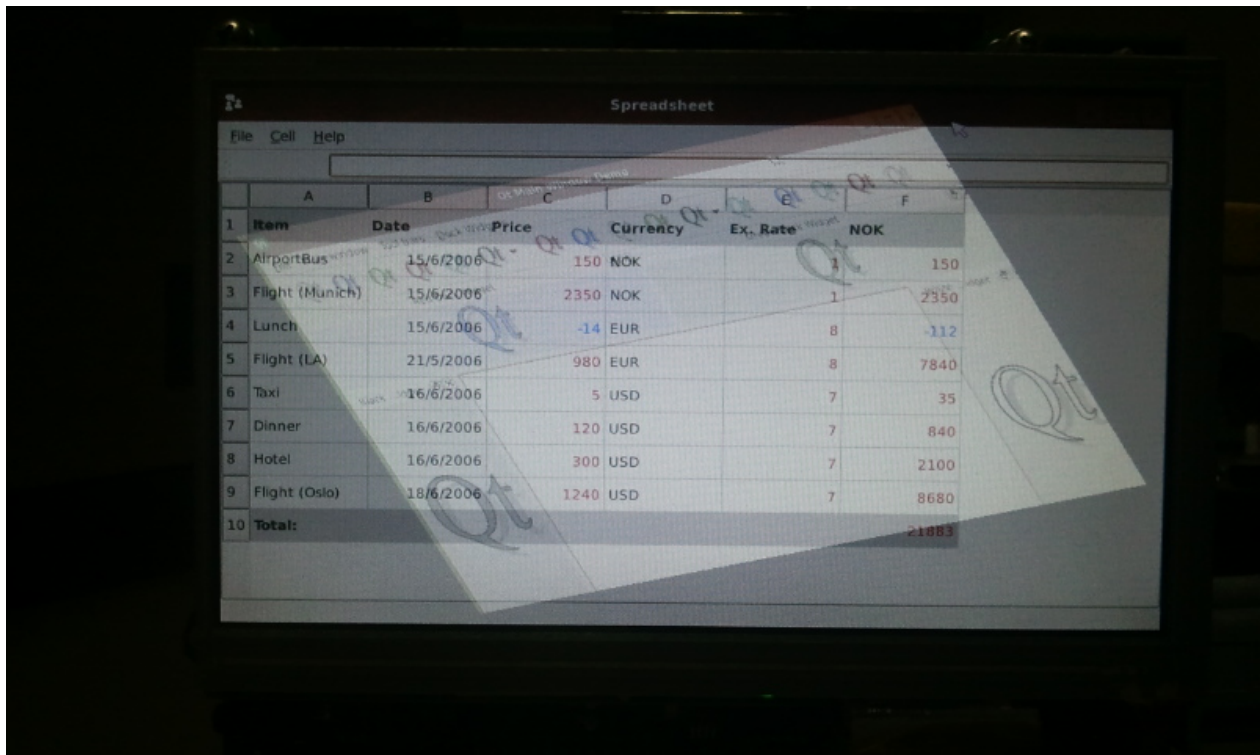

Cb - Background color

Cg - Graphics color

Usage Examples

```
#!/usr/bin/qltopia/demos/mainwindow/mainwindow                -qws                -display  
linuxfbofs:gfx_no=0:xpos=-0.75:ypos=0.75:width=1.5:height=1.5:blend_en=1:glob_alpha_en=1:global_alpha=0.5:rotate=  
&  
#!/usr/bin/qltopia/demos/spreadsheet/spreadsheet              -qws                -display  
linuxfbofs:gfx_no=1:xpos=-1.0:ypos=1.0:width=2.0:height=2.0:blend_en=1:glob_alpha_en=1:global_alpha=0.5:rotate=0.0  
&
```

Display Snapshot:

transBgSmpQtUI

A sample Qt application, demonstrating a simple UI with transparent background, alpha channel set to '0' for the background plane.

Refer to the source for more details.

Overall Execution steps on Target

- stop the matrix demo if it's running in the background

```
# /etc/init.d/matrix-gui-2.0 stop
```
- run the init script, required to be run only once. Creates named pipes needed for communicating across modules.

```
#./init.sh
```
- set the Window System EGL for flip mode, content of the "/etc/powervr.ini" should be as below

```
[default]
#WindowSystem=libpvrPVR2D_FRONTWSEGL.so.1
WindowSystem=libpvrPVR2D_FLIPWSEGL.so.1
```
- Insert the bufferclass (texture streaming extn module) module if it's not inserted already

```
#insmod /opt/gfxlibraries/gfx_rel_es8.x/bufferclass_ti.ko
```
- insert cmem module, allocating memory for each plane.

```
Pool size for Graphics Plane = width * height * Bytes Per Pixel
Pool size for Video Plane = video frame width * height * 2 (Bytes Per Pixel) * 6 (buffers)
#insmod          cmemk.ko          "phys_start=0x88000000          phys_end=0x8F800000
pools=1x10000000,1x10000000,1x10000000,1x10000000,1x5000000,1x5000000,1x5000000,1x5000000
allowOverlap=1"
```
- Run the composition application

```
# cd /opt/gpu-compositing/
```

```
# ./composition &
```

- Set up the Graphics planes -

e.g. for global alpha

```
#/usr/bin/qtopia/demos/spreadsheet/spreadsheet
```

```
-qws
```

```
-display
```

```
linuxfbofs:gfx_no=0:xpos=-1.0:ypos=1.0:width=2.0:height=2.0:blend_en=1:glob_alpha_en=1:global_alpha=0.25:rotate=0.0  
&
```

e.g. for pixel level alpha

```
#./transBgSmpQtUI
```

```
-qws
```

```
-display
```

```
linuxfbofs:gfx_no=2:xpos=-1.0:ypos=1.0:width=2.0:height=2.0:blend_en=1:glob_alpha_en=0:rotate=0.0 &
```

- Set up the gstreamer video

e.g.

```
gst-launch filesrc location=/opt/gpu-compositing/streams/AAC_HEv1/2012_AAC_HE_720x480_24fps.mp4 !
```

```
decodebin2 name=dec ! gpuvsink x-pos=-1.0 y-pos=1.0 width=2.0 height=2.0 channel-no=0 rotate=0.0 &
```

Display snapshot:

Limitations/Known Issue

- Color distortion in video planes if formats selected across channels results in different Bytes Per Pixel Size
- A channel (Graphics/Video) can not be re-opened with different resolution
- Running two Qt applications on the same display may not always work fine as it's not a practical usage. The demos showing two qt applications are just for illustrating the composition of multiple graphics planes
- Sanity tested only. Very limited testing for the number of planes more than 2
- GStreamer throws an error "There may be a timestamping problem, or this computer is too slow" along with display artifact when CPU is loaded more than 100%
- Input controls like touch screen and cursor position in Qt framework maps to the full screen and not the resized UI

- Tested on AM335x platform only

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. TO THE EXTENT THIS LICENSE MAY BE CONSIDERED TO BE A CONTRACT, THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

License

1. Definitions

- a. **"Adaptation"** means a work based upon the Work, or upon the Work and other pre-existing works, such as a translation, adaptation, derivative work, arrangement of music or other alterations of a literary or artistic work, or phonogram or performance and includes cinematographic adaptations or any other form in which the Work may be recast, transformed, or adapted including in any form recognizably derived from the original, except that a work that constitutes a Collection will not be considered an Adaptation for the purpose of this License. For the avoidance of doubt, where the Work is a musical work, performance or phonogram, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered an Adaptation for the purpose of this License.
- b. **"Collection"** means a collection of literary or artistic works, such as encyclopedias and anthologies, or performances, phonograms or broadcasts, or other works or subject matter other than works listed in Section 1(f) below, which, by reason of the selection and arrangement of their contents, constitute intellectual creations, in which the Work is included in its entirety in unmodified form along with one or more other contributions, each constituting separate and independent works in themselves, which together are assembled into a collective whole. A work that constitutes a Collection will not be considered an Adaptation (as defined below) for the purposes of this License.
- c. **"Creative Commons Compatible License"** means a license that is listed at <http://creativecommons.org/compatlicenses> that has been approved by Creative Commons as being essentially equivalent to this License, including, at a minimum, because that license: (i) contains terms that have the same purpose, meaning and effect as the License Elements of this License; and, (ii) explicitly permits the relicensing of adaptations of works made available under that license under this License or a Creative Commons jurisdiction license with the same License Elements as this License.
- d. **"Distribute"** means to make available to the public the original and copies of the Work or Adaptation, as appropriate, through sale or other transfer of ownership.
- e. **"License Elements"** means the following high-level license attributes as selected by Licensor and indicated in the title of this License: Attribution, ShareAlike.
- f. **"Licensor"** means the individual, individuals, entity or entities that offer(s) the Work under the terms of this License.
- g. **"Original Author"** means, in the case of a literary or artistic work, the individual, individuals, entity or entities who created the Work or if no individual or entity can be identified, the publisher; and in addition (i) in the case of a performance the actors, singers, musicians, dancers, and other persons who act, sing, deliver, declaim, play in, interpret or otherwise perform literary or artistic works or expressions of folklore; (ii) in the case of a phonogram the producer being the person or legal entity who first fixes the sounds of a performance or other sounds; and, (iii) in the case of broadcasts, the organization that transmits the broadcast.
- h. **"Work"** means the literary and/or artistic work offered under the terms of this License including without limitation any production in the literary, scientific and artistic domain, whatever may be the mode or form of its expression including digital form, such as a book, pamphlet and other writing; a lecture, address, sermon or other work of the same nature; a dramatic or dramatico-musical work; a choreographic work or entertainment in dumb show; a musical composition with or without words; a cinematographic work to which are assimilated works expressed by a process analogous to cinematography; a work of drawing, painting, architecture, sculpture, engraving or lithography; a photographic work to which are assimilated works expressed by a process analogous to photography; a work of applied art; an illustration, map, plan, sketch or three-dimensional work relative to geography, topography, architecture or science; a performance; a broadcast; a phonogram; a compilation of data to the extent it is protected as a copyrightable work; or a work performed by a variety or circus performer to the extent it is not otherwise considered a literary or artistic work.
- i. **"You"** means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.
- j. **"Publicly Perform"** means to perform public recitations of the Work and to communicate to the public those public recitations, by any means or process, including by wire or wireless means or public digital performances; to make available to the public Works in such a way that members of the public may access these Works from a place and at a place individually chosen by them; to perform the Work to the public by any means or process and the communication to the public of the performances of the Work, including by public digital performance; to broadcast and rebroadcast the Work by any means including signs, sounds or images.
- k. **"Reproduce"** means to make copies of the Work by any means including without limitation by sound or visual recordings and the right of fixation and reproducing fixations of the Work, including storage of a protected performance or phonogram in digital form or other electronic medium.

2. Fair Dealing Rights

Nothing in this License is intended to reduce, limit, or restrict any uses free from copyright or rights arising from limitations or exceptions that are provided for in connection with the copyright protection under copyright law or other applicable laws.

3. License Grant

Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

- a. to reproduce the Work, to incorporate the Work into one or more Collections, and to Reproduce the Work as incorporated in the Collections;
- b. to Create and Reproduce Adaptations provided that any such Adaptation, including any translation in any medium, takes reasonable steps to clearly label, demarcate or otherwise identify that changes were made to the original Work. For example, a translation could be marked "The original work was translated from English to Spanish," or a modification could indicate "The original work has been modified.";
- c. to Distribute and Publicly Perform the Work including as incorporated in Collections; and,
- d. to Distribute and Publicly Perform Adaptations.
- e. For the avoidance of doubt:
 - i. **Non-waivable Compulsory License Schemes.** In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme cannot be waived, the Licensor reserves the exclusive right to collect such royalties for any exercise by You of the rights granted under this License;
 - ii. **Waivable Compulsory License Schemes.** In those jurisdictions in which the right to collect royalties through any statutory or compulsory licensing scheme can be waived, the Licensor waives the exclusive right to collect such royalties for any exercise by You of the rights granted under this License; and,
 - iii. **Voluntary License Schemes.** The Licensor waives the right to collect royalties, whether individually or, in the event that the Licensor is a member of a collecting society that administers voluntary licensing schemes, via that society, from any exercise by You of the rights granted under this License.

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. Subject to Section 8(f), all rights not expressly granted by Licensor are hereby reserved.

4. Restrictions

The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

- a. You may Distribute or Publicly Perform the Work only under the terms of this License. You must include a copy of, or the Uniform Resource Identifier (URI) for, this License with every copy of the Work You Distribute or Publicly Perform. You may not offer or impose any terms on the Work that restrict the terms of this License or the ability of the recipient of the Work to exercise the rights granted to that recipient under the terms of the License. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties with every copy of the Work You Distribute or Publicly Perform. When You Distribute or Publicly Perform the Work, You may not impose any effective technological measures on the Work that restrict the ability of a recipient of the Work from You to exercise the rights granted to that recipient under the terms of the License. This Section 4(a) applies to the Work as incorporated in a Collection, but this does not require the Collection apart from the Work itself to be made subject to the terms of this License. If You create a Collection, upon notice from any Licensor You must, to the extent practicable, remove from the Collection any credit as required by Section 4(c), as requested. If You create an Adaptation, upon notice from any Licensor You must, to the extent practicable, remove from the Adaptation any credit as required by Section 4(c), as requested.
- b. You may Distribute or Publicly Perform an Adaptation only under the terms of: (i) this License; (ii) a later version of this License with the same License Elements as this License; (iii) a Creative Commons jurisdiction license (either this or a later license version) that contains the same License Elements as this License (e.g., Attribution-ShareAlike 3.0 US); (iv) a Creative Commons Compatible License. If you license the Adaptation under one of the licenses mentioned in (iv), you must comply with the terms of that license. If you license the Adaptation under the terms of any of the licenses mentioned in (i), (ii) or (iii) (the "Applicable License"), you must comply with the terms of the Applicable License generally and the following provisions: (I) You must include a copy of, or the URI for, the Applicable License with every copy of each Adaptation You Distribute or Publicly Perform; (II) You may not offer or impose any terms on the Adaptation that restrict the terms of the Applicable License or the ability of the recipient of the Adaptation to exercise the rights granted to that recipient under the terms of the Applicable License; (III) You must keep intact all notices that refer to the Applicable License and to the disclaimer of warranties with every copy of the Work as included in the Adaptation You Distribute or Publicly Perform; (IV) when You Distribute or Publicly Perform the Adaptation, You may not impose any effective technological measures on the Adaptation that restrict the ability of a recipient of the Adaptation from You to exercise the rights granted to that recipient under the terms of the Applicable License. This Section 4(b) applies to the Adaptation as incorporated in a Collection, but this does not require the Collection apart from the Adaptation itself to be made subject to the terms of the Applicable License.
- c. If You Distribute, or Publicly Perform the Work or any Adaptations or Collections, You must, unless a request has been made pursuant to Section 4(a), keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or if the Original Author and/or Licensor designate another party or parties (e.g., a sponsor institute, publishing entity, journal) for attribution ("Attribution Parties") in Licensor's copyright notice, terms of service or by other reasonable means, the name of such party or parties; (ii) the title of the Work if supplied; (iii) to the extent reasonably practicable, the URI, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and (iv), consistent with Section 3(b), in the case of an Adaptation, a credit identifying the use of the Work in the Adaptation (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). The credit required by this Section 4(c) may be implemented in any reasonable manner; provided, however, that in the case of a Adaptation or Collection, at a minimum such credit will appear, if a credit for all contributing authors of the Adaptation or Collection appears, then as part of these credits and in a manner at least as prominent as the credits for the other contributing authors. For the avoidance of doubt, You may only use the credit required by this Section for the purpose of attribution in the manner set out above and, by exercising Your rights under this License, You may not implicitly or explicitly assert or imply any connection with, sponsorship or endorsement by the Original Author, Licensor and/or Attribution Parties, as appropriate, of You or Your use of the Work, without the separate, express prior written permission of the Original Author, Licensor and/or Attribution Parties.
- d. Except as otherwise agreed in writing by the Licensor or as may be otherwise permitted by applicable law, if You Reproduce, Distribute or Publicly Perform the Work either by itself or as part of any Adaptations or Collections, You must not distort, mutilate, modify or take other derogatory action in relation to the Work which would be prejudicial to the Original Author's honor or reputation. Licensor agrees that in those jurisdictions (e.g. Japan), in which any exercise of the right granted in Section 3(b) of this License (the right to make Adaptations) would be deemed to be a distortion, mutilation, modification or other derogatory action prejudicial to the Original Author's honor and reputation, the Licensor will waive or not assert, as appropriate, this Section, to the fullest extent permitted by the applicable national law, to enable You to reasonably exercise Your right under Section 3(b) of this License (right to make Adaptations) but not otherwise.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability

EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. Termination

- a. This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Adaptations or Collections from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.
- b. Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

- a. Each time You Distribute or Publicly Perform the Work or a Collection, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.
- b. Each time You Distribute or Publicly Perform an Adaptation, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.
- c. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.
- d. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.
- e. This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.
- f. The rights granted under, and the subject matter referenced, in this License were drafted utilizing the terminology of the Berne Convention for the Protection of Literary and Artistic Works (as amended on September 28, 1979), the Rome Convention of 1961, the WIPO Copyright Treaty of 1996, the WIPO Performances and Phonograms Treaty of 1996 and the Universal Copyright Convention (as revised on July 24, 1971). These rights and subject matter take effect in the relevant jurisdiction in which the License terms are sought to be enforced according to the corresponding provisions of the implementation of those treaty provisions in the applicable national law. If the standard suite of rights granted under applicable copyright law includes additional rights not granted under this License, such additional rights are deemed to be included in the License; this License is not intended to restrict the license of any rights under applicable law.
